OBJECTIVE

Looking for an entry-level software developer role where I can apply my knowledge and grow by working on real projects. I enjoy solving problems, learning new things, and working with others to build useful applications. I aim to be part of a team where I can improve my skills, contribute to meaningful work, and start my journey in the tech industry with a positive impact.

SKILLS

Programming:	JavaScript, TypeScript, NodeJS, SQL, NoSQL, HTML, CSS
Databases:	PostgreSQL, MongoDB
Libraries/Frameworks:	Express.js, React.js, Bootstrap
Tools:	Git, Postman
Platforms:	Github, Netlify, Firebase
Soft Skills:	Communication, Teamwork, Problem-solving

EDUCATION

2016 - 2020	B.Tech in Electronics and Communication, University: MAKAUT (WBUT)	(7.6)
2016	Class 12th WBCHSE	(63%)
2014	Class 10th WBBSE	(73%)

PROJECTS

Quiz App

[Link](#)

This React Quiz App is built using JavaScript, TypeScript, React, Router, Bootstrap CSS, and a live API and Deploy to Netlify. Users can select a quiz category, answer 10 multiple-choice questions, and view their score instantly. Passing users can fill a form to generate and print a personalized achievement certificate.

Movie booking and search

[Link](#)

A dynamic React web app built with JavaScript, TypeScript, React Router, and Bootstrap CSS. Users can search movie details using a live API, view information, and book tickets seamlessly. The app also generates a digital ticket upon booking confirmation for user convenience.
